

THISURIKA HASAJITH

Data Science Undergraduate

+94783720275 | donthisurika@gmail.com | Sri Lanka | [LinkedIn](#) | [GitHub](#)

ABOUT ME

Enthusiastic second year Data Science undergraduate with a strong interest in business analytics and data driven decision-making. Skilled in analyzing data, identifying patterns, and translating technical results into meaningful business insights. Focused on gaining practical experience and developing deeper skills through real-world projects. An active participant with strong communication and teamwork abilities, committed to contributing to innovative solutions and bridging the gap between technology and business needs.

EDUCATION

BSc (Hons) in Information Technology - Specializing in Data Science
Sri Lanka Institute of Information Technology (SLIIT), Malabe Campus
2024 - Present (Expected Graduation: 2028)
Current Year: 2nd Year, Semester 2

PROJECTS

Smart Agro System and Disease Detection System | 2026 January - Present

- Developed an AI-powered crop disease detection platform using environmental and other data, helping farmers make faster decisions and increase yield efficiency.
- Technologies: React, Node.js, MongoDB, RESTful APIs, Python, TensorFlow
- Integrated AI-based disease detection to improve crop health decision-making.
- Implemented data-driven features such as confidence scoring and real-time insights.
- Designed an interactive system with chatbot support for user guidance.
- Currently enhancing the system by migrating from Python to a full-stack architecture using Node.js and MongoDB to improve scalability and usability
- Focus: Supporting data-driven agricultural decisions and improving user experience

[\[GitHub Link\]](#)

Facial Expression Recognition System | 2025 July - 2025 November

- Developed a deep learning-based system to analyze and classify human facial expressions.
- Performed dataset preprocessing to improve data quality
- Applied CNN models to identify emotional patterns from image data.
- Evaluated model performance using accuracy metrics and validation techniques.
- Analyzed facial expression data to identify emotional trends, enabling insights into customer behavior and improving decision-making for user experience optimization.

[\[GitHub Link\]](#)

Crop Recommendation AIML Project | 2025 December - 2026 January

- Built a predictive system to recommend optimal crops based on environmental and soil data (N, P, K, temperature, humidity, pH, rainfall)
- Conducted data preprocessing and feature analysis to improve prediction accuracy.
- Delivered insights to support better agricultural decision-making.
- Designed a user-friendly interface to present recommendations clearly.

[\[GitHub Link\]](#)

Smart Water Tank and Purification System IoT Project | 2024 July - 2024 November

- Designed and developed an IoT based system to monitor water levels and quality in real time.

Tutor and Student Management System | 2025 January - 2025 May

- Developed a Java based system to manage online class activities using object oriented programming principles
- Technologies: Java (OOP), File Handling, HTML, CSS
- Features: Student and course management, file-based data storage, efficient data sorting using Merge Sort, and simple web interface for user interaction.

[\[GitHub Link\]](#)

FeedBack Management System | 2025 july - 2025 November

- Contributed to the development of a web-based land management system; designed and implemented a feedback management system to collect, organize and analyse user feedback.
- Technologies: React, Java and Spring Boot and SQL (SSMS)
- Features: Submit, View, Check and Update ticket, Upload attachments, Dashboard with ticket statistics

SKILLS

Technical Skills

- Languages: Java | Python | R | SQL | HTML | CSS | JavaScript | NodeJS
- Frameworks & Libraries: Express | React | Pandas | TensorFlow
- Databases: MySQL | MongoDB
- Data Analysis: Data preprocessing, Data Visualization, basic statistical analysis
- Cloud & DevOps: AWS
- Tools & Platforms: PowerBI | Postman | Microsoft Excel
- Other: OOP (Object Oriented Programming)

Soft Skills

- Leadership | Problem Solving | Teamwork | Verbal & Written Communication | Analytical Skills | Photographer | Graphic Designer | Adaptability | Language Skills : English

CERTIFICATIONS

2026

Certificate in Machine Learning using Python Machine learning using python

<https://lnkd.in/gMR92HGw>

2026

Certificate in ChatGPT for Data Analytics

<https://www.simplilearn.com/free-chatgpt-for-data-analytics-course-skillup>

2026 - In Progress

Certificate in Data Science

CLUB ACTIVITIES

- Member of MS Club SLIIT
- Global Member of IEEE
- Member of IEEE SLIIT
- Committee Member of Lumara Project
- Member of School Media Club - Photographer
- Participant - Sasanka Sansade First Commit Work Series
- Participant - AWS Club Meeting

VOLUNTEER EXPERIENCE

Thala 2026

As a volunteer for Thala 2026, supporting stage setup and decoration.

SLIIT Food Festival 2024

Assisting with event setup and photography for smooth event execution
